LIMS Key Features

- **Business Automation:** Software are being used on global scale to automate business processes. AIMS LIMS is a software solution to automate all Calibration and Testing Laboratories process/data.
- **Data Centralization:** AIMS LIMS provide multiple data entry points and stores data in a centralized location, same data is linked to multiple modules to avoid duplicate entries.
- **Data Analysis:** AIMS LIMS can be used to gather and analyze all type of data generated by Calibration and Testing Laboratories during routine operation and can be traced back for audit trail.
- **Secure and Reliable:** AIMS LIMS is built on latest technology which provides highest security levels against i.e., SQL Injection and maintain data integrity.
- **Role and authorization:** AIMS LIMS provides Access Control List (ACL) to enable and disable miscellaneous software functionalities for multiple users.
- **Responsive Layouts:** AIMS LIMS can be run on multiple screen sizes i.e., mobile, tablets, laptops.
- **Global Access:** To run AIMS LIMS all that you need is internet access and a smart device.
- **Business Reporting:** AIMS LIMS can generate customized reports for all management levels to analyze periodic data and make informed decisions for consistent business growth.
- **Customization:** AIMS LIMS can be customized to meet multiple business process requirements.
- **Maintenance Support:** Round the clock maintenance support is available to fix software bugs and errors. Enhancement in LIMS functionalities will not disturb overall structure of the system.
